Lucita,

Thanks for this. The flipside of this interpretation is that when we make a decision to exempt an aquifer, the regulations do specifically describe the type of injection activity, i.e. 146.4(b)(1) and does clearly tie it to a Class II or III permit application (also echoed in 144.7(c). **Attorney Client 5**

Lucita: fyi, this is language I am assuming you have already considered in advising us on these situations.

Thanks,

douglas

Douglas & Wendy –

Attached is a PDF of a page from the 1984 UIC Program Final Rule which talks about “limited” AEs and the need to acquire an additional AE for other injections into that existing AE. Sorry about not getting this to you sooner but I just remembered that you had asked where such language was.

Enjoy,
Kurt
